OilSafe Srl is aware of the importance of offering its customers the guarantee of a product of high competitiveness and technology, which finds its strengths in predictive maintenance programs, in technological design and in the service activities that also extend to the post-production phase. For this purpose, the organisation has set up, maintains and enforces a Quality Management System in accordance with UNI EN ISO 9001:2015.

The company's mission focuses on the following strengths:

- A highly specialized design of benches and testing units for hydraulic components to meet specific needs of the customer and allow the realization of a "tailor made product";
- A highly specialized design that allows the study and implementation of units and systems of filtration, dehumidification and thermoregulation of fluids to meet specific needs of the customer and allow the realization of a "customized product";
- Predictive maintenance programs that enable the management and prevention of potential product failures or wear and therefore a long-term return on investment for the customer;
- Post-production services that provide solid support to the customer as well as support and training on the realization of the new product.

In order to maintain a Quality Management System that ensures high levels of production in compliance with national, international and UNI EN ISO 9001:2015 regulations, OilSafe sets and pursues the following objectives:

- Analysis of its environmental context and use of the risk-based thinking as preventive tools to ensure the continuous improvement of the services and the complete satisfaction of the customer and other stakeholders;
- Keep track of all business processes, ensuring the necessary resources for each of them and assessing related risks and opportunities that can impact the quality of the product offered to the Customer;
- Implementation of procedures and operational instructions for activities and dissemination to all the business functions concerned, in order to ensure the handling and control of internal and external processes and the prevention of non-compliance;
- Definition of strategic objectives, productivity and customer satisfaction. Analysis of specific indicators that measure their periodic monitoring, the degree of achievement of the objectives and customer satisfaction, in order to continuously improve their performance;
- Attention to human resources, through an accurate selection of material and tools and a plan to grow skills and professionalism;
- Ongoing commitment to communication, transparency and collaboration between company functions in order to promote and strengthen the concepts of empowerment, integration and professional growth of its employees and collaborators;

	<h2>QUALITY POLICY</h2>	AII01.00-MN05 27/05/2016

- Implementation of surveillance, monitoring and measurement procedures in order to check the continuous compliance and adequacy of its Quality Management System, the effectiveness of the actions taken and the achievement of the predetermined objectives;
- Pursue the continuous improvement of objectives and company performance, always in compliance with laws and regulations, respecting the environment and protecting the health and safety of its workers.

The Management of OilSafe undertakes to respect, support and communicate, at every company level and to all interested parties, this Quality Policy through publication on its website and in information points and company meetings.
